

# WHAT WE DO - UK Skills Ltd.

## 21st century Learning & Qualifications

UK Skills is an enabler, an organisation dedicated to bringing best practice, quality educational resources and innovative systems from the UK to India. These learning resources and systems will support the development, training and education of all communities in India and across the world; including e-Assessment, e-Learning and faculty/institution management.

UK Skills works as a consultant, project manager, enabler, with partners in the UK, India and beyond to identify, develop and deploy quality, innovative, proven materials for training, learning and assessment. UK SKILLS is a company registered in the UK as a not-for-profit organisation operating in the arena of the development, procurement and deployment of educational resources. It works in the UK and India on all areas of education, training and qualifications. UK Skills works with partners in the UK and India to bring together experience and expertise from across the educational and training world. It has the express commitment to provide reliable, realistic and worthwhile learning and assessment to all sectors of Indian society.

We work with our partners and affiliates to identify the most appropriate resources from the UK and beyond, tailor these to the requirements of Indian learners and work with local partners to provide 21st Century skills, knowledge and understanding for Indian students.

Our Manifesto, our Contract with the Learner

1. UK skills brings the best of UK assessment, qualifications, learning, training systems and education services from UK and around the world to be localised and translated to suit Indian regional or sector requirements.
2. Education for Employment Foundation (EEF) our Indian partner assists UK Skills to work with Indian education and training bodies to provide advice, training, assessment, certification and accreditation to meet learner needs

Together

3. We work with ITI's, schools, universities and training institutions across India and across sectors to
  - a. Raise teaching standards
  - b. Upgrade facilities and services
  - c. Provide up to date and relevant content
  - d. Assess and Certify to international standards
4. We work with Indian Skills and Education bodies to provide advice and consultancy on development of standards, qualifications, assessments and training/learning materials that reflect best practice and the latest technologies and techniques
5. We manage our own training establishments to the highest international standards and provide relevant and appropriate training directly to learners from centres of excellence and best practise
6. We partner and work with Indian Education, public sector, charities and private sector bodies to carry out specific projects around curriculum and assessment
7. We develop new curriculum and training materials to bring to Indian education and training with ways to bring internationally recognised tools, techniques and technology.
8. We bring assessment, learning content, services and systems to the Indian Market, which we have localised for the benefit of learners
9. We provide content in fundamental skills of literacy, numeracy, financial literacy, and I.T. to supplement existing curriculum and as standalone courses
10. We provide teacher and trainer skills upgradation projects for education and training establishments.
